(54) MOTOR EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a motor equipment which permits good attaching and fixing without deforming connecting terminals, when attaching a connector portion to the main body of a motor and moreover permits the elimination of manual work in assembly, thereby improving the workability.

SOLUTION: This motor equipment 1 has a motor main body and a connector housing 30 to be attached and fixed to the motor main body. Guide means 20 is arranged on either the connector housing 30 or motor main body for guiding purpose. In other arrangement, guided means 40 to be guided by the guide means 20, fitting means to be arranged on either one of the above, and fitted means to be fitted to another are provided, and the guide means 20 and the guided means are linked together and are guided before the fitting means and fitted means are fitted together, and then the connector housing 30 and the motor main body are connected and fixed in the motor equipment.
